

DATA-CRAFT GRANTED ROYAL WARRANT

Datacraft Design Limited is proud to announce that it has been granted a Royal Warrant as a Tradesman to Her Majesty The Queen in the capacity of manufacturer and supplier of Space Management Software.

As a leading provider of software designed to manage meetings, events, facilities and security, London-based Datacraft has worked with the Royal Household for six years. The Warrant took effect on 1st January 2008 and is approved for five years.

The grant allows the display of the Royal Arms, as shown here, on our stationery, packaging and premises, and this will be done with great pride.

Royal Warrants are a mark of recognition to people or companies who have regularly supplied goods or services for at least five years to certain members of the Royal Family. They have always been regarded as a mark of excellence and quality, and are highly prized.

“We are delighted and honoured to receive this grant. It is an outstanding achievement - a reflection of the professionalism of the team here at Datacraft, and the quality of the software solutions we provide,” commented Isobel O’Donnell who, as Managing Director, is the Grantee of the Warrant.

The Grantors, as they are known, are advised by the Lord Chamberlain who is head of the Royal Household and chairman of the Royal Household Tradesmen’s Warrants Committee. The final decision to grant a Royal Warrant is made by the member of the Royal Family concerned.

At present around 800 firms hold Royal Warrants of Appointment. They represent the widest cross-section of British trade and industry (there are a small number of overseas firms). They range from individuals practising traditional crafts to large firms equipped with the latest technology. Whether they are coal merchants or computer suppliers, florists or fishmongers they share a total commitment to the highest standards of service and quality.

*Datacraft helps companies throughout the world manage meetings with their clients in a profitable, prompt and professional manner. Our acclaimed software, **Global Hospitality Suite™** is used worldwide by major corporate bodies, especially in the Financial, Legal and Consulting sectors, as well as many other organisations with intensive resource management needs. Our **FlexiDesk** solution provides tools for the management of Hot Desks (Hotelling), which is becoming an increasingly popular flexible working culture.*

We offer fully integrated solutions for total meeting and space management, including conference rooms, videoconferencing, facility and service management, and visitor control. Complete support, implementation and training services are also available.
